

YÖK Course Platform

The YÖK Courses project was shared with the public in recent months among the targets of the New YÖK in 2020. Our preparations within the scope of this project have been completed and digital course contents produced by our universities are offered for open access through this interface, which we call YÖK Courses Platform (Higher Education Institutions Courses). At the first stage, this platform, which includes the course contents of Anadolu University, Atatürk University and Istanbul University, we believe that with the contribution of our other universities, it will develop and enrich in terms of both the number of programs and courses and the variety of content. This platform is a ground that contributes to further raising the quality bar in higher education. The departments of our universities that will allow students to choose these courses will also ensure that their students meet different academic cultures. "Social justice and equal opportunity" constitutes the basis of our understanding of higher education.

We would like to thank our academicians who prepared the course content offered for access in this project, which is a valuable product of the "Open Science and Open Access" policy pursued by the new YÖK, and these three universities that contributed to this process.

The YÖK Courses Platform opens the lessons and knowledge of the valuable academicians of our country to all our students. Based on permanent evolution, this platform will be continuously developed and enriched for our students to access qualified course resources.

And finally, we would like to express that we believe that education is a public service.

Professor Dr. M. A. Yekta Saraç
